Ironmaking and Steelmaking
Contents: 2004 Volume 31

15 **Effect of carbonisation time at stamp charged battery on properties of blast furnace coke**
U. S. Yadav, R. Sharma, P. S. Dash, M. Guha and D. P. Deshpande

23 **Demanganisation of high manganese pig iron to produce high manganese slag**
H. El-Faramawy, T. Mattar, M. Eissa, K. El-Fawakhry and A. M. Ahmed

31 **Silicomanganese production from manganese rich slag**
H. El-Faramawy, T. Mattar, M. Eissa, K. El-Fawakhry and A. M. Ahmed

37 **Fluid flow and mixing characteristics in RH degasser of Companhia Siderúrgica de Tubarão, and influence of bottom gas injection and nozzle blockage through physical modelling study**
C. A. da Silva, I. A. da Silva, E. M. de Castro Martins, V. Seshadri, C. A. Perim and G. A. Vargas Filho

43 **Estimation of mechanical properties of steel strip in hot dip galvanising lines**
J. B. Ordieres Meré, A. González Marcos, J. A. González and V. Lobato Rubio

51 **Experimental study of boiling heat transfer during subcooled water jet impingement on flat steel surface**
A. T. Hauksson, D. Fraser, V. Prodanovic, and I Samarasekera

57 **Challenges in the modelling of scale formation and decarburisation of high carbon, special and general steels**
H. F. Marston, P. H. Bolt, G. Leprince, M. Röder, R. Klima, J. Niska and M. Jarl

66 **The development of high speed steel rolls by extrusion casting**
H. Fu, Q. Xiao and J. Xing

71 **Analysis of rolling load generated by pair crossed rolling mill**
S. Omori, T. Kajiwara, H. Hino and H. Goto

81 **Working range of roll pass sequences in wire rod rolling with interstand tensions**
C. Eriksson and S.-E. Lundberg

93 **Prediction of shape defects during cooling of hot rolled low carbon steel strip**
R. Colás, L. A. Leduc and M. A. Neri

117 **Review of applicability of unreacted core model based on Ishida–Wen model**
H. W. Kang and W. S. Chung

125 **Simple method for theoretical estimation of viscosity of oxide melts using optical basicity**
H. S. Ray and S. Pal

131 **Novel concept of cleansing liquid steel of solid oxide inclusions by cullet injection in ladle**
E. T. Turkdogan

135 **Viscosity effect of titanium pickup by mould fluxes for stainless steel**
T. Mukongo, P. C. Pistorius and A. M. Garbers-Craig

144 **Development of integrated model for batch annealing of cold rolled steels**
S. S. Sahay, A. M. Kumar and A. Chatterjee

153 **Precision online model for prediction of strip temperature in hot strip rolling**
J. H. Lee, W. J. Kwak, C. G. Sun, K. H. Kim, K. H. Ko and S. M. Hwang

169 **Modelling effect of hot rolling process variables on microstructure and mechanical properties of low carbon strip steels**
X. Sha, D. Li, Y. Zhang, X. Zhang and Y. Li

191 **Global warming: a cool view**
F. Fitzgerald

199 **Optimisation of suction pressure for iron ore sintering by genetic algorithm**
N. K. Nath and K. Mitra

207 **Optimisation of taphole angle to minimise flow induced wall shear stress on the hearth**
S. K. Dash, D. N. Jha, S. K. Ajmani and A. Uphadhyaya

216 **Variation in hot metal and slag composition during tapping of blast furnace**
A. J. Andersson, A. M. T. Andersson and P. G. Jönsson

227 **Heat transfer process simulation by finite differences for online control of ladle furnaces**
J. R. S. Zabadal, M. T. M. B. Vilhena and S. Q. Bogado Leite

235 **Effect of ladle age on formation of non-metallic inclusions in ladle treatment**
N. N. Tripathi, M. Nzotta, A. Sandberg and Du Sichen

241 **Defect prediction in hot strip rolling**
U. Elsilä and J. Röning

249 **Inclusion engineering of steel to prevent chemical tool wear**
S. V. Subramanian, H. O. Gekonde, G. Zhu, X. Zhang, U. Urlau and H. Roelofs

258 **Role of phase and grain size on chip formation and material work hardening during machining of single and dual phase steels**
R. M'Saoubi and H. Chandrasekaran

265 **Magnetically graded materials fabricated by inhomogeneous heat treatment of deformed stainless steels**
Y. Watanabe and I. Momose

269 **Determination of the P_{e} value of 5 wt-% calcia stabilised hafnia solid electrolyte at high temperatures**
C. T. Mutale and P. C. Pistorius

295 **Roll performance – technical overview and future outlook**
E. Kerr, R. Webber and D. McCaw

300 **Design criteria for rolling contact fatigue resistance in back-up rolls**
M. F. Frolish and J. H. Beynon

305 **Production of thick plate on the hot strip mill at the Rourkela steel plant (RSP)**
A. Deva, S. K. Mohaptra and R. Datta

312 **Effect of thermomechanical processing and aging on microstructure and precipitation hardening in low carbon Cu–B steel**
S. Datta, P. S. Banerjee and M. K. Banerjee

319 **Hot forging of fittings made from seamless pipe**
C. Lázaro-Naranjo, M. P. Guerrero-Mata, J. Martínez, P. Fodor and R. Colás

325 **EAF and secondary dust characterisation**
M. C. Mantovani, C. Takano and P. M. Büchler

333 **Behaviour of kaolinite coated olivine pellets in blast furnace**
P. L. Hooey, K. Zarins, A. Dahlstedt and H. Annersten

342 ***Short communication*** **Carbon pickup of interstitial free steel from Al_2O_3–C refractories**
G. Z. Ruan and N. Li

357 **Mould thermal monitoring – a window on the mould**
A. S. Normanton, P. N. Hewitt, N. S. Hunter, D. Scoones and B. Harris

364 **Investigation of mould thermal behaviour by means of mould instrumentation**
G. Xia and H. P. Narzt, Ch. Fürst, K. Mörwald, J. Moertl, P. Reisinger and L. Lindenberger

371 **Optimisation of geometry of 185 × 185 mm square billet mould of Sidenor continuous casting machine**
M. R. Ridolfi, A. Gotti, J. J. Laraudogoitia and V. Santisteban

376 **Developments in online surface and internal quality forecasting of continuously cast semis**
A. S. Normanton, B. Barber, A. Bell, A. Spaccarotella, L. Holappa, J. Laine, H. Peters, N. Link, F. Ors, A. Lopez and J. J. Laraudogoitia

383 **Introduction of enhanced indefinite chill and high speed steel rolls in European hot strip mills**
M. Andersson, R Finnström and T. Nylén

389 **Manufacture of centrifugal cast high speed steel rolls for wire rod mills**
H. G. Fu, Q. Xiao and J. Xing

393 **Ladle glaze: major source of oxide inclusions during ladle treatment of steel**
K. Beskov and Du Sichen

401 **Submerged liquid slag injection in steel melt: scaleup study using cold model and dimensional analysis**
Satadal Ghorai, G. G. Roy and S. K. Roy

409 **Relative anisotropy of structures and ultrasound attenuation response between laboratory casting in permanent mould (vacuum induction melted) and casting processed through electroslag refining**
M. R. Suresh, M. Kiran Kumar, P. Ravindran, I. Samajdar, P. P. Sinha, N. B. Ballal and P. Kishna Rao

417 **Simplified approach for prediction of spread, roll load and torque in grooveless rolling of billets**
L. S. Bayoumi and S. M. Byon

465 **Megabytes for metals: development of computer applications in the iron and steel industry**
J. Aylen

479 **Influence of reduction temperature on prereduction of iron oxide with coal carbonisation gas without tar**
T. Usui, N. Inoue, T. Watanabe, T. Yokoyama, T. Oyama and Z. Morita

485 **Investigation of strand surface defects using mould instrumentation and modelling**
B. G. Thomas, M. S. Jenkins and R. B. Mahapatra

495 **Numerical determination of heat transfer coefficient for boiling phenomenom at runout table of strip mill**
S. Sikdar and A. Mukhopadhayay

503 **Experimental and numerical analysis of ladle teeming process**
G. M. Mazzaferro, M. Piva, S. P. Ferro, P. Bissio, M. Iglesias, A. Calvo and M. B. Goldschmit

509 **Slag formation during high temperature interactions between refractories containing SiO_2 and iron melts with oxygen**
E. Kapilashrami, V. Sahajwalla and S. Seetharaman

514 **Impact of slag–refractory lining reactions on the formation of inclusions in steel**
K. Beskow, N. N. Tripathi, M. Nzotta, A. Sandberg and Du Sichen

News and views

97 ***Industry perspective*** **Sustainability – steel and the environment** by L. Brimacombe

177 ***Industry perspective*** **Rolling mills – beyond the engineering** by M. Steeper

183 ***Inaugural Bessemer Lecture*** **The relevance of Sir Henry Bessemer's ideas to the steel industry in the twenty-first century** by J.-P. Birat

273 ***R&D profile*** **Corus RD&T: a wealth of knowledge: fit for the challenges of the future** by D. Hamels

277 ***Sector overview*** **Trends and challenges in the stainless steel industry** by P. Erkkilä

285 ***Process update*** **Direct reduction process using fines and with reduced CO_2 emission** by A. Morrison *et al*

428 **Environmental challenges for the iron- and steelmaking process** by N. Schofield, R. Fisher and D. R. Anderson

435 **Recycling steelmill byproducts – some practical developments and outstanding issues** by D. Evans, T. Hartwell, N. Jones and C. Byrne

440 **Construction products for a sustainable society** by G. Hillier

444 **ZEWA – metallurgical process for treatment of residues from steel industry and other industrial sectors to generate valuable products** by A. Fleischanderl, U. Gennari and A. Ilie

450 **Long products development at Outokumpu Stainless Sheffield** by J. Beeley, D. Harris and T. Clarke

456 **The automated roll shop** by M. Leuning

460 **Compact caster concept for increased capacity and flexibility in slab production** by J. Guttenbrunner, F. Derflinger, K. Engel, K. Holzer, I. Kalmer and O. Kreigner

Conference reports pages 2, 8, 99, 347

Obituaries pages 291, 292

International conference diary pages 14, 176, 190, 293, 356, 464
